

President's Report  
Greg Elems  
2/13/21

It's been a busy month with family issues and some foul weather keeping me from the museum. The weather put off the roof repair, if we get a week of no snow I will be contacting D&D Roofing. Mechanical work has been progressing slowly but things are getting done. More information on that from David Elems. As part of the mechanical department work, I will be contacting Chase Banking to set up a credit card for the department to start purchasing parts for our engine work. Not much else to report for the last month. Keep safe and stay well.
