ITEM: New Business Item 1
FROM: Eugene Vicknair and Janet Steeper

HVAC Addition to Museum Store

There have been discussions for many years about improving the heating and cooling in the store.

I have been researching high efficiency “mini-split” HVAC units that are easy to install, low cost and self-contained. Based on my research, Janet and I want to install the following 2 Zone system in the eastern end of the Museum Store:

<https://www.acwholesalers.com/LG-LMU183HV-2-LSN090HSV5/p57458.html>

Indoor wall mounted components

Outdoor condenser

Cost to purchase system and support elements will likely run about \$2,600.

If approved, I will talk to Ed Powell and Eric McKay about trying to get this system installed before Santa Trains.

REQUESTED ACTION:

Approve expense of \$2,800 under line item 53065 - Store Fixtures / Facility.
