MUSEUM COVERED HOPPERS The two hopper cars we have in Portola are good examples of the first type of covered hopper cars used by Trailroad, a lot differant Ξ. to the styles we see today going by. WP Pullman PS-2 covered hopper car 11509, series 11501-11510 blt by Pullman in Feb 58. This old gray car was the first type of large WP 11509 capy covered hoppers WP took delivery of. It's seen a lot of hard service and we are going to repaint it into its gray delivery markings, note builders photos ... Robins Rails Inc. has a new HO kit of this type of PS-2 available. WP 11530 was blt by American Car & Foundary in '59 for Sacamento Northern series 5001-5010. WP renumbered them into WP series 11526-11534 in the early seventies. This car will also be repainted back into SN 5005 and lettered Sacamento Northern.
