ARCHIVES RESEARCH FACILITY

A lot of work has been going on with the Archives Facility. Greg Elems cleared out more space to allow work to proceed. A tank for the humidifier has been ordered and should be arriving shortly. Kerry Cochran and I have worked out the physical layout of the electrical components. We now have executable quote for the fire suppression installation. And a crew has been assembled for a big work party this weekend. We need to keep driving to hit the deadline for getting the facility up and open.
