

*When photographed in 1939, this Western Pacific composite GS gon was exactly as built in 1918 except that Andrews trucks had replaced the original Arch Bar trucks. Note the shaft-and-chain mechanism for operating the drop bottom doors. WP owned 1,100 of these cars, numbered 4101-4500 and 5301-6000. Photo: W.C. Whittaker. No known decals.*
