

FEATHER RIVER RAIL SOCIETY AGENDA REPORT

DATE: March 6, 2004
FROM: Director Monger
ITEM: New Business 3
SUBJECT: **Historic SP/PFE Equipment Available**

Received a call from Jeff Moreau a week and a half ago.

There is a RV Park just north of Vacaville on Midway Road which has 5 pieces of railroad equipment that they want to "give to a good home". I went out on Saturday and took photos of the equipment.

It includes 2 ex-SP steel cupola cabooses that sit side-by-side which have been converted into an office, and three early model mechanical PFE 50-foot reefers - one converted into a men's and women's shower facility, one converted into a laundry and one used as storage.

We can briefly discuss this information (if anyone is interested) then I can turn all information over to the A&D committee or anyone else that might want to follow up on this.
