

# Modeling the Western Pacific Railroad WP Convention Cars

Over the years the FRRS has held several WP Conventions.

A lot of the members of the FRRS are also WP modelers. During some of the early years the managers of the conventions decided to start to produce a convention car, usually in HO scale.

These car can in both kit and ready to run form.

I have a few of these HO scale models in my collection and would like to share with the members on the list of them and what they look like.  
(Should I have missed some, please let me know)

1998 Red Caboose Reefer car

MOW Ice Service kit

2009 Athearn WP 50' double door box car

Side one

Side two

2019 Tidewater Southern 50' single door box car

This car was available in two road numbers, 501 and 509

2020 WP 40' outside braced wood box car,

This car came with an extra decal sheet to change the road number to three other numbers.
